**INDONESIA** | Climate change and scores of other problems, from illegal wells to run-down development to politics, pose an imminent threat to the city's survival.

Hydrologists say the city has only a decade to halt its sinking. If it can’t, northern Jakarta and its millions of residents will end up underwater.

Jakarta, Indonesia — Forested mountain ridges recall places that once held springs and volcanoes. Now they are just memories.

Food and forests are disappearing. So are the hills that once rose up from the flatlands below.

A man cleans up a restaurant in Jakarta, Indonesia. No remembers when the sea was a good distance from his doorstep. Now it is just steps away.

Random ocean waves are now a regular sight.

Global warming is not the only agent behind the endless floods that over­whelm Jakarta’s lowlands and much of the rest of Java in 2017. The problem, it turned out, was that the city itself is sinking.

In fact, Jakarta is sinking faster than anywhere else in the world.

Rasdiono, an athlete to the city’s people, says that sometimes the city has a slight inclination.

It was strange, said Rasdiono, who owns a restaurant in Jakarta, Indonesia. He remembers when the sea was a good distance from his doorstep. Now it is just steps away.

Jakarta is sinking faster than any other big city on the planet, faster, even, than climate change is causing the sea to rise — so quickly that the city is unable to dry its streets.
